

**Please amend the remaining claims as follows:**

*b1*  
26. (Twice Amended) A method of preventing or treating a tumor in an animal which comprises administering to said animal a tumor inhibiting effective amount of a semi-allogeneic immunogenic cell, wherein said cell comprises an antigen-presenting cell expressing at least one class I MHC or class II MHC determinant that is syngeneic to said animal and at least one class I or class II MHC determinant that is allogeneic to said animal, and wherein said antigen-presenting cell is transformed with genomic DNA isolated from the tumor cells of said animal.

*B2*  
41. (Amended) The method according to claim 26, wherein said antigen presenting cell is further transformed with a nucleic acid molecule coding for at least one cytokine.

*b3*  
43. (Amended) The method according to claim 26, wherein said antigen-presenting cell is selected from the group consisting of a fibroblast, a macrophage, a B cell, and a dendritic cell.

44. (Amended) The method according to claim 26, wherein said tumor is a solid tumor or a hematological tumor.

*B4*  
46. (Amended) The method according to claim 26, wherein said animal is a human subject.

**REMARKS**

In the Office Action dated September 25, 2001, claims 3-4, 16, 26 and 29-46 are pending. Claims 3-4, 14 and 29-38 are withdrawn from consideration as drawn to non-elected
